# Trees for Bees

Supporting honey bees with sugar water and supplemental feed is common practice. The land surrounding your apiary can also provide bountiful resources. Trees and shrubs are critical pollen and nectar sources for honey bees and wild pollinators.

Join Denise Natoli Brooks to learn more about:

- what native trees and shrubs support pollinators
- options for sourcing and planting native trees and shrubs
- how to plan plantings for many months of honey bee pollen and nectar

*Central State University, an 1890 Land-Grant Institution, is committed to the full inclusion of all people, and does not discriminate on the basis of age, ancestry, race, color, disability, gender identity or expression, genetic information, HIV/AIDS status marital or family status, military status, national origin, political beliefs, religion, sex, sexual orientation, or veteran status.
